## 9 Years Since 9/11: Suspicious Yet?

Hi, my name is Vijay Sarma, my number is 647-857-5755, and I'm running for Mayor to fight for our future. For example, see how governments spend billions on the "War on Terror" and spying on us, but the wars still get worse and they don't catch any terrorists?

The G20 Summit "martial law" shows where this goes if we don't stop it. The people working to run the world want to use the threat of "terror" to take our rights and "climate change" to take our stuff. They fight, but they make more money working together, so they do. We can too. 1200 architects and engineers at AE911Truth.org should prove to us that 9/11 was an inside job, but there's more and nearly everyone over 30 has questions. What's next? Should our candidates expose the truth to protect our rights? Why not? ☺
